

Define your own objective function

with the „userObjFunction“ option

Link to tutorial video: <https://www.youtube.com/watch?v=JeiyWpvgAck>

Problem definition:

- Calibrate streamflow at the outlet of subcatchments 1 and 3
- Use R square (R^2) as the performance index
- Use different weights

$$OF = \frac{1 \cdot R_{Q1}^2 + 2 \cdot R_{Q3}^2}{3}$$
